

The #1 hacking tool globally is still key logging and the use of screen capture malware.

The SentryBay Armored Client is downloaded and run on the endpoint to protect data being entered into corporate apps, VDI solutions, SaaS applications, and more. It doesn't detect. It scrambles and protects.

Multi-layered, kernel level anti-keylogging technology protects against data exfiltration. Your chosen applications are securely wrapped and run in secure containers, preventing threats from accessing sensitive information.

The SentryBay Armored Client provides real time, patented protection to applications & data without needing to detect & respond to threats.

EMPLOYEES, SUPPLIERS, CONSULTANTS

SECURE REMOTE ACCESS

Unmanaged / BYOD

Armored Client provides a more secure way of accessing any corporate remote access system, including Citrix, MS RDS, VMware Horizon or Windows WDI on Azure.

EMPLOYEES

CORPORATE APPLICATIONS

Corporate Managed Device

Corporate Apps are targeted on the endpoint and run in a secure session through the Armored Client, protecting from unidentified threats.

EMPLOYEES, CUSTOMERS

WEB BASED APPS & SaaS

Corporate or Customer Device

SaaS Internet or Internal Web Apps are accessed by the Armored Client Secure Browser. The secure browser can be locked down to specific URLs matching those services to be accessed.

We understand the challenge of securing data in a transforming work environment.

DIFFICULT TO SECURE DEVICES

Employees are adding personal devices onto the corporate network. Devices are being left unattended at home.
Devices are being used for business and personal matters.

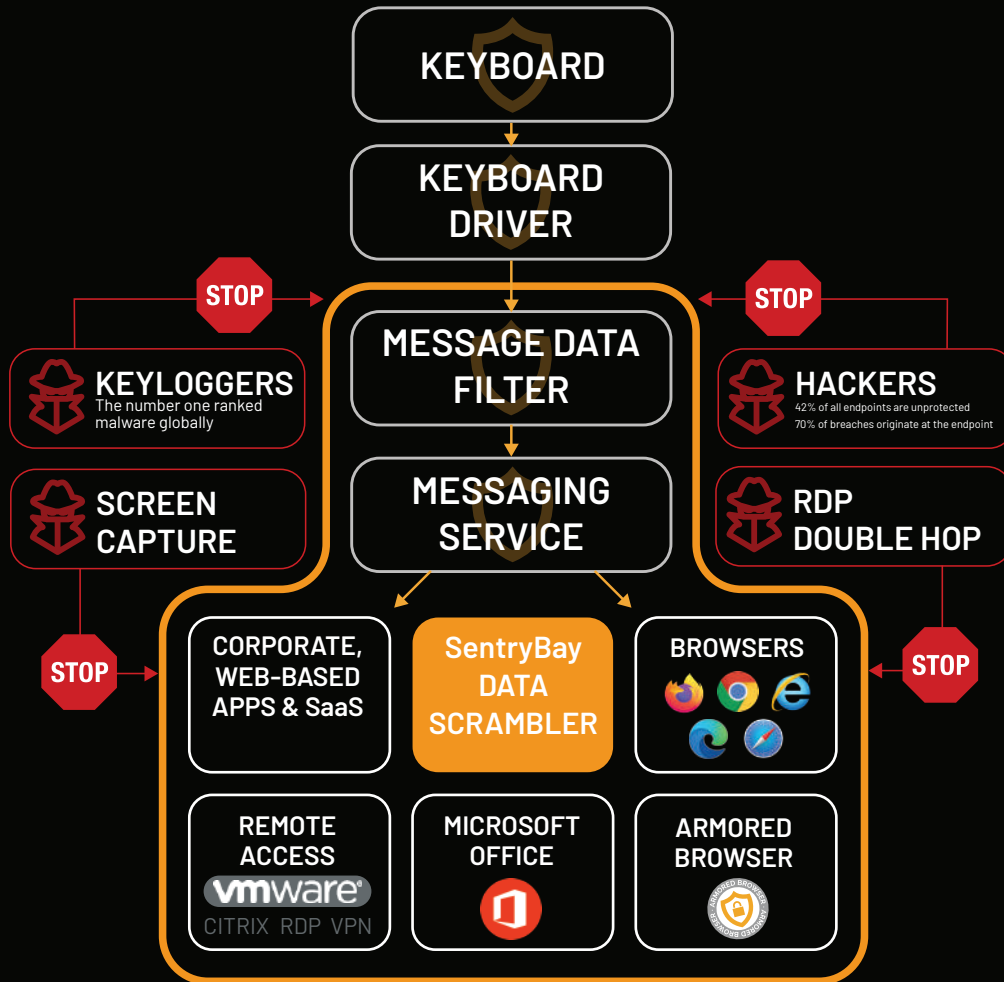

ENDPOINTS ARE BEING TARGETED

2020 report data shows a sharp rise in cyber attacks on end users, to gain access to sensitive data and corporate networks.

THERE ARE HOLES IN STANDARD ARMOR

Existing Anti-virus, EDR, MDM and other threat detection and response software is unable to effectively secure data on endpoint devices, particularly from keylogging and screen scraping.

Trusted by over 5 million users across banks, governments, healthcare, legal, critical infrastructure, financial and corporates, globally.

PROTECT YOUR ENDPOINT DEVICES FROM:

KEY LOGGING

SCREEN CAPTURE

SESSION HIJACKING

MITM/MITB ATTACKS

OTHER MALWARE

WHILST PROVIDING:

- Compliments your existing Anti-Virus, EDR, VPN & MDM solutions
- Protection of login credentials and the entire session activity
- Protection of sensitive data into local applications
- Elimination of browser compatibility issues
- Automatic updates
- Ease of deployment and enforcement
- Regulatory Compliance - Mitigate data breaches and potential financial penalties
